Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2627

1) Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

2) The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The following title is suggested:

TRACK JUMP METHOD FOR DUAL LAYERS OPTICAL DISK READING DEVICE.

3) The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4) Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1-8 recite the step of performing a calculation function but the specification did not specific show what is “calculation function” and how to perform this step. Without this teaching one of ordinary skill in the art cannot practice the invention.

5) Claims 1-3 *and* 7 rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The condition when the second address B on second data layer is larger than the first address A of first data layer are critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). The invention is an improvement over prior arts of figures 1-5 which covers the condition when second address B on second data layer is larger than and smaller than the first address A of first data layer, but claims 1-3 and 7 did not recite the features of second address B on second data layer is larger than the first address A of first data layer. Without this critical feature the claims are not enable by the disclosure.

6) Claims 4,5 *and* 8 *are* rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The condition when the second address B on second data layer is smaller than the first

address A of first data layer are critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). The invention is an improvement over prior arts of figures 1-5 which covers the condition when second address B on second data layer is larger than and smaller than the first address A of first data layer, but claims 4,5 and 8 did not recite the features of second address B on second data layer is smaller than the first address A of first data layer. Without this critical feature the claims are not enable by the disclosure.

7) The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant is reminded that in amending in response to a rejection of claims (if the rejection involves with any applicable arts), the patentable novelty must be clearly shown in view of the state of the art disclosed by the references cited and the objection made. Applicant must also show how the amendments avoid such references and objections. See 37 CFR § 1.111(c).

Form PTO-892 is attached herein.
